The diagram illustrates a complex Salesforce Flow with multiple parallel execution paths. Each path begins with a decision diamond (yellow circle with a red border) that branches into several action steps (red rectangles with white text). The flow is organized into a grid-like structure, with paths running horizontally and vertically. The action steps are connected by lines, indicating the sequence of operations. The flow is designed to handle multiple parallel processes, likely for data synchronization or batch processing. The diagram is rendered in a light blue and white color scheme, typical of the Salesforce Flow Builder interface.
